

The email mockup features a pink 'L' shaped icon in the top left corner. The word 'Mail' is displayed in a large pink font. Below it, a blue square icon is shown. The email header includes a profile picture of Paula Davis and the text 'From: Paula Davis' and 'Subject: Welcome and First Steps'. The body of the email contains the following text: 'Hello,' followed by a paragraph welcoming the recipient to 'Web Code!' and mentioning 'Amazing Events'. The next paragraph states the goal of developing an app from zero and requests JavaScript exercises. The third paragraph expresses enthusiasm for the project and mentions a meeting with 'Amazing Events' to clarify details. The final paragraph encourages the recipient to brush up on JavaScript while working on 'Amazing Events' project goals. The email concludes with a 'Thanks,' and the signature 'Paula Paula Davis', 'Team Lead', and 'Code of the Web'. On the left side of the email body, there are four blue square icons arranged in a 2x2 grid. On the right side, there are four horizontal pink lines.

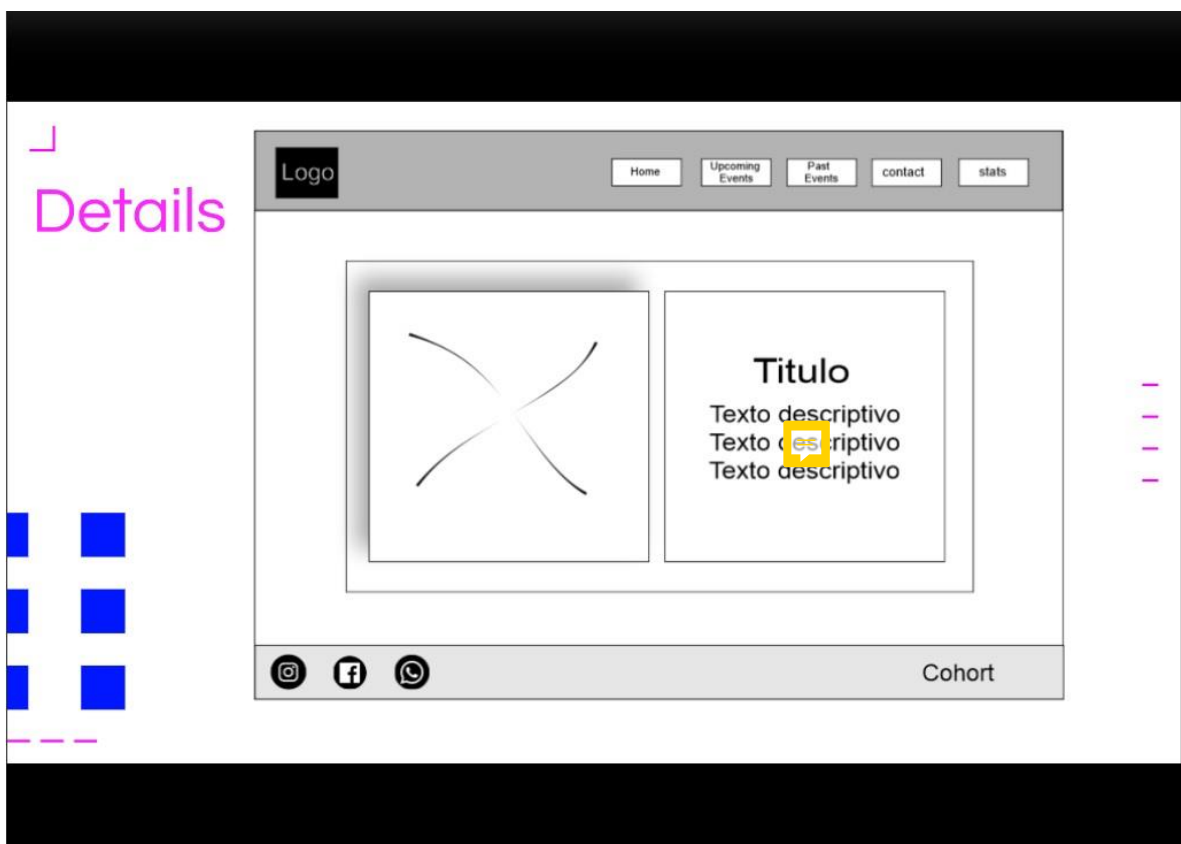

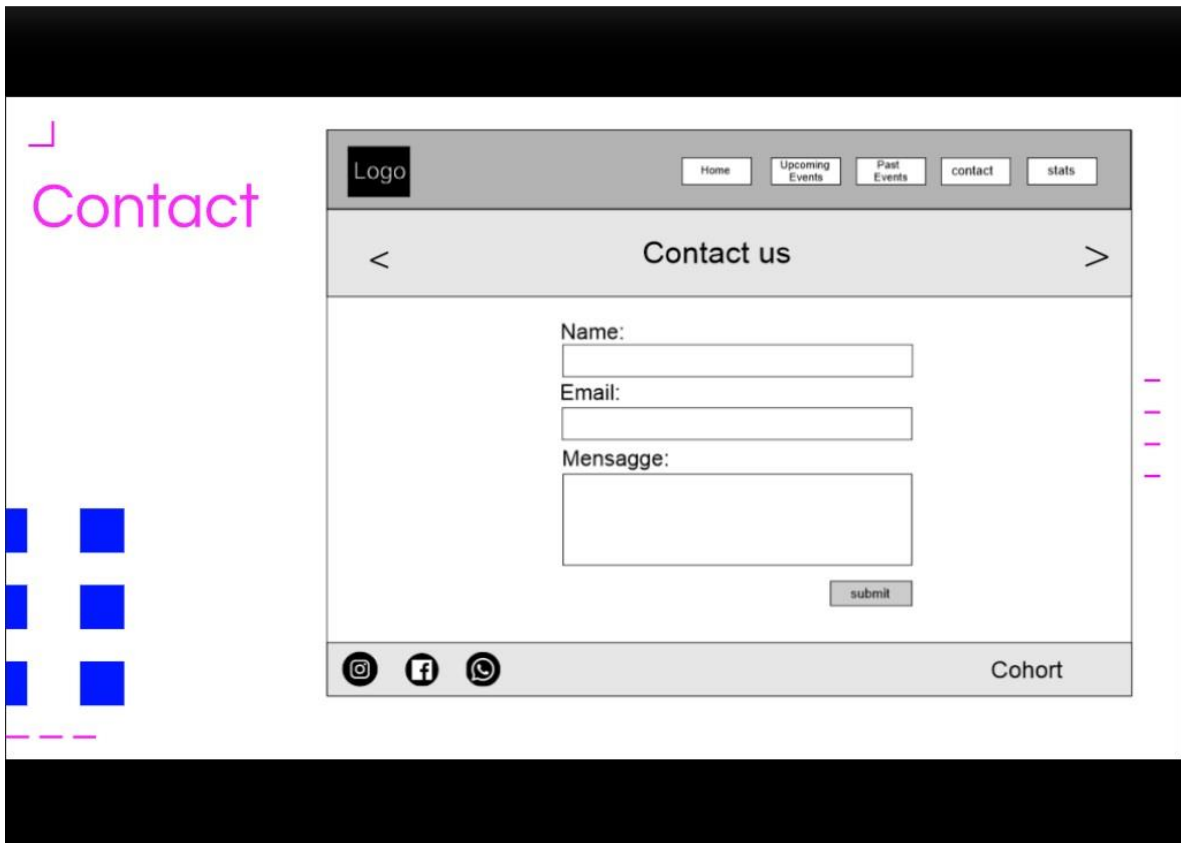

Home

Events

Note that it's one page for Future events and another for Past events with the same design

Delivery

- You must have the 6 HTML (Home, Upcoming Events, Past Events, Contact, Details, Stats) previously presented in mockups.
- Your navBar should be working and you should be able to navigate between different pages.
- Avoid having Validator errors, structure your project folder correctly and define the names of each of the files correctly.
- You can use your own CSS or your preferred library, if you do it with a library, make sure that your project represents you, that is, the components are not identical to those found in the library.
- Incorporates the logo and the favicon in your page.
- Detail in the cards that is found in Home or Upcoming and Past events should be less that we found in Details, that is because this last one complete all event information and the previous ones are summarized or introduction to the event.
- Use the pictures we sent to make the cards of the events.
- Distribute the spaces correctly and keep in mind that this project will be full responsive.

¡SUCCESS....!
